PROFESSIONAL SUMMARY

Full-Stack Developer with exactly 2 years of professional experience building scalable web and mobile applications using React, React Native, Node.js, and AWS serverless technologies. Experienced in mentoring junior engineers and freshers, conducting interviews, and driving team-wide knowledge sharing in Agile environments. Skilled in integrating and consuming **REST APIs / GraphQL**, managing state with **Redux**, and resolving performance bottlenecks using **Chrome DevTools and Lighthouse**. Recognized for delivering

WORK EXPERIENCE

Indexnine Technologies – Pune, Maharashtra

Software Engineer | Jan 2024 – Present

- Led end-to-end development of Dwellin Pro Connect (React Web App), including UI architecture, authentication flows, and reusable component libraries.
- Delivered cross-platform builds for Dwellin (React Native Mobile App), optimizing performance and backend API integrations.
- Built and deployed UI components and APIs for European Athletics (React Native App).
- Worked on Voyager React Web Application for All My Sons – Movers & Packers.
- Developed serverless backend services using AWS Lambda, Node.js, and MongoDB.
- Independently built Driver Tablet App, Check-In / Check-Out App, and Estimator App using React Native.
- Integrated Clover Android SDK via custom React Native bridge.
- Implemented ZooStand and NativeWind for React Native styling.
- Implemented Jest unit tests (85%+ coverage) and optimized performance using Chrome DevTools and Lighthouse.
- Mentored junior engineers and collaborated with cross-functional teams.

ACHIEVEMENTS

- Product Mindset Award
- 2nd Runner-Up – AI Hackathon
- Participated in spec-driven development AI Hackathon

TOOLS

React, React Native, Redux, JavaScript, TypeScript, Node.js, AWS Lambda, MongoDB, Zustand, NativeWind, REST, GraphQL, Swagger, Bootstrap, Tailwind CSS, Git, Postman, JIRA, Agile

EDUCATION

Vishwakarma University Pune

B.Tech in Computer Engineering Graduation Date: Jun 2023

Coursework: Data Structures, Object Oriented programming, SQL, Web Technologies, AI & Machine Learning, Cyber security

PROJECT EXPERIENCE

Personal Projects Pune

- **Instagram Clone (React Native)** – Developed a full-featured social app replicating core functionalities (feed, likes, comments, profile), improving understanding of real-time updates and state management with Redux.
- **E-commerce Platform** – Built a small-scale online store with authentication, shopping cart, and product filtering/sorting, enhancing practical knowledge of full-stack integration and responsive design.
- **Food Ordering App** – Created a real-time food ordering application emphasizing intuitive design and live updates, resulting in a seamless user experience and hands-on experience with React Native components.
- **Game Catalog Website (React + RAWG API)** – Developed a fully responsive, API-driven game catalog website, demonstrating proficiency in data fetching, dynamic UI rendering, and mobile-first design principles.

SKILLS

UI/Frontend: React.js, React Native, NativeWind, Redux, HTML, CSS, Bootstrap, Tailwind, JavaScript, TypeScript, Zustand

Backend: Node.js, Flask, GraphQL, MongoDB

Tools & DevOps: Git, Postman, JIRA, Swagger, AWS Cognito, Xcode, Cursor, Antigravity

Testing & Performance: Jest, Clean Code Practices, Chrome DevTools, Lighthouse, Postman

Methodologies: Agile Scrum, REST API development, Mobile-first design, Component-based architecture

Others: MongoDB, Python, Responsive Design, Product Thinking

Interests: UI/UX Design, Agile, Real-Time Applications, Hackathons, Full stack developments, Product Management
